

App: Loaner**Developer: First Last****App definition statement**

Connect with your community to find items to lend and to borrow and keep track of them easily with Loaner. Loaner is a marketplace app with borrowing and lending instead of buying and selling. The app allows people to find useful items that other people are willing to lend and connects those people together.

Key Features

- User Login and Signup
- Left side navigation drawer
- Post and search for items
 - Upload photos and item locations.
- Chat (Messaging) with other users.
- Track User's items and borrowed items

User Profile

Target audience is an urban and sub-urban living teenage to middle age adults interested in sharing goods to save money collectively on renting and purchasing equipment for short-term user.
